Research with Children-Pia Christensen 2017-01-12 The entirely revised third edition of Research with Children forms a unique resource book on the methodology of childhood research with a core emphasis on theory driven practices. As in the previous two editions, this edition presents particular standpoints in the field, whilst also reflecting the latest developments in the now well-established interdisciplinary field of childhood studies. A rich collection of contributions from leading researchers across a range of disciplinary backgrounds, research practices and theoretical perspectives discuss central questions of epistemology and methodology, demonstrating the links between theory and practice. This edition includes exciting new chapters on: Internet-based research and contemporary technology, Family based research, Children as researchers, Participatory research in the global context, New directions for childhood research. Both theoretical and practical questions are set out in a well-argued fashion that enables easier navigation through the various complexities of the epistemological and methodological questions arising in contemporary research practices with children. As such, this text will appeal to both the newcomer to childhood studies and to experienced researchers in the field. With fully updated chapters, new material and a revised, clearer structure, this new edition will be a valuable resource for researchers working with children.

The Design of Childhood-Alexandra Lange 2018-06-12 From building blocks to city blocks, an eye-opening exploration of how children's playthings and physical surroundings affect their development. Parents obses over their children's playdates, kindergarten curriculum, and every bump and bruise, but the toys, classrooms, playgrounds, and neighborhoods little ones engage with are just as important. These objects and spaces encode decades, even centuries of changing ideas about what makes for good child-rearing--and what does not. Do you choose wooden toys, or plastic, or, increasingly, digital? What do youngsters lose when seesaws are deemed too dangerous and slides are designed primarily for safety? How can the built environment help children cultivate self-reliance? In these debates, parents, educators, and kids themselves are often caught in the middle. Now, prominent design critic Alexandra Lange reveals the surprising histories behind the human-made elements of our children's pint-size landscape. Her fascinating investigation shows how the seemingly innocuous universe of stuff affects kids' behavior, values, and health, often in subtle ways. And she reveals how years of decisions by toymakers, architects, and urban planners have helped—and hindered—American youngsters' journeys toward independence. Seen through Lange's eyes, everything from the sandbox to the street becomes vibrant with buried meaning. The Design of Childhood will change the way you view your children's world—and your own.

Material History Review- 2001

2010- 2010-12-16 Reviews are an important aspect of scholarly discussion because they help filter out which works are relevant in the yearly flood of publications and are thus influential in determining how a work is received. The IBR, published again since 1971 as an interdisciplinary, international bibliography of reviews, it is a unique source of bibliographical information. The database contains entries on over 1.2 million book reviews of literature dealing primarily with the humanities and social sciences published in 6,820, mainly European scholarly journals. Reviews of more than 560,000 scholarly works are listed. The database increases every year by 60,000 entries. Every entry contains the following information: On the work reviewed: author, title On the review: reviewer, periodical (year, edition, page, ISSN), language, subject area (in German, English, Italian) Publisher, address of journal

Making Space for Children-Bryn Varley Hollenbeck 2008 This dissertation analyzes the relationship of the home to child rearing and family life between 1900 and 1950. This study explores the ways in which parents used their homes to nurture their children, and the reasons why different options were available and attractive. Specifically, this project tours the middle class family house and investigates the construction and use of the many spaces of childhood: the small child's bedroom; the household spaces, inside and out, where the child played; and the places utilized for education and discipline. The sources include design treatises, medical literature, advice manuals, government publications, trade literature, poetry and fiction, works of art, photographs, autobiographies, and personal writings in letters and baby books. Through this research, it becomes clear that evolving theories of child rearing, the realities of parenting, and the activities of children shaped the ideology,
Continued efforts to realize the childhood project will automatically guarantee the "best interest of the child." Flexible Childhood? - Helmut Wintersberger 2007 Children's spaces are widening â†‘ culturally and socially. Socially, children's spaces are more often multilocal. Culturally, they are enlarged through mobility in the globalized and virtual spaces in the media-saturated world. Children's times are also less confined by strict borderlines. The more flexible and individualized use of time in the world of work impacts on children's lives in families, day care, and school. The chapters of this volume each present particular temporal and spatial aspects of social change in childhood. The book is directed toward considering the impact of such change on children's welfare. As former boundaries between generations begin to blur and neo-liberal forces enter all realms of people's lives, it can no longer be taken for granted â†‘ as it was in former periods of modernity â†‘ that continued efforts to realize the childhood project will automatically guarantee the "best interest of the child." With respect to children's welfare in time and space, Flexible Childhood? discusses tensions between demands from the market economy, dynamics of rationalization and technology, and visions of a "good" childhood. Together with the above companion volume â†‘ Childhood, Generational Order and the Welfare State, also by the University Press of Southern Denmark â†‘ this book is the final result of COST Action A19, Children's Welfare, which has been supported by the European COST Framework.

Rapid Dominance-Mark E. Harter 2000 Rapid dominance—the ability of forces to exploit information and quickly destroy critical targets—is the key in controlling the battle space of future warfare. The ability to rapidly gain information, analyze it, and use it to make sound military decisions is key to military domination and victory. Huge volumes of critical war-fighter information speed through the space medium to reach their destinations at the strategic, operational, and tactical levels. Information provided via space systems is crucial to military planning and executing aerospace operations through the entire spectrum of conflict and therefore a key to any future military operation. Unfortunately, potentially greater space power contributions are often limited due to a lack of "space mindedness" by military leaders, planners, and operations during theater campaigns. This paper identifies the importance and legitimacy of space as a center of gravity and military war-fighting medium, focusing on the realm of the joint air operations center (JAOC). It defines five key areas (with practical suggestions) that the

Department of Defense needs to address in order to integrate space into military operations: space training, doctrine, equipment, personnel, and command and control. The research first documents current deficiencies of space awareness in the typical JAOC and then identifies and suggests methods to improve joint war fighting through space integration in the JAOC and the Expeditionary Aerospace Force (EAF) of the near future. The research presented here is particularly important for the United States Air Force to consider in preparation for the EAF—it provides a framework to educate JAOC and EAF personnel to more effectively employ joint aerospace power throughout the spectrum of military operations.
