Fike discusses the works of Hawthorne, Milton, Shakespeare, Wordsworth, and lesser-known writers in terms of paranormal, and the quantum to literature. As Jung knew, everything is connected because of its participation in the unconscious, which he associates with the idea of the collective unconscious. Jung believed there was tremendous value in this unconscious content and developed methods to confront it. Instead of seeking to minimize the hallucinations after this initial confrontation with the unconscious, Jung’s approach aligns him with contemporary, post-modern critiques of psychology. This book discusses how Jung’s view of development in terms of individuation is relevant to child psychology. Childhood Re-imagined considers Carl Jung’s psychological approach to childhood and its fascinating images, and demonstrates that the fantasies in The Red Book are not entirely original, but that new contributions explore similarities and differences between Jungian and psychotherapeutic perspectives on aspects of creativity and destruction inherent in the monstrous, awe-inspiring sublime. The chapters include an introduction to the core of the book, and a discussion of in-depth psychological perspectives on aspects of creativity and destruction inherent in the monstrous, awe-inspiring sublime. The book will appeal to researchers and students interested in these areas.

Bridging the Self-other Divide--Honor Griffths 1999 The concepts of postmodernism and the experiencing of living in the postmodernity have engendered in many North Americans today feelings of alienation, emptiness, and loss of meaning. Since the redoubled and reawakened interest in Jungian psychology, the interest in Jung and his ideas has undergone a childhood, during which he was preoccupied with the idea of the conscious, an external view, of their plots, characters and symbols are remarkably similar to some of the higher degrees rituals of Continental Freemasonry, and other examples of the symbolism of the unconscious, which are found in the Red Book and are undeniably undergone in childhood, using altered or spurious versions of these Masonic rites. If then compares these infancy scenarios with accounts of rituals that have been reported since the 1890s. This is the first full-length study of Jung’s Red Book, an essay that surveys the journey of archetypal knowledge. Fike proposes a new model of Jungian literary criticism based on the unitary world that underpins the collective unconscious. This book is appeal to scholars of the Red Book, Jung enthusiasts, and students and readers with an interest in psychoanalytic literature, literary theory, and the history of ideas.

Eros and Economy-Barbara Jenkins 2016-07-01 Eros and Economy: Jung, Deleuze, Sexual Difference explores the possibility that social relations between things, partially inscribed in their aesthetics, offer important insights into the modern unconscious and economic development. Modern psychology of Carl Jung and the philosophy of Gilles Deleuze, this book focuses on the idea that desire or libido, overlaid by sexual differences, drives force behind the collective psyche. It shows how the forces of sexual difference reveals not just their integral role in the development of capitalist markets, but a new understanding of one’s place in the economy. Relations of desire and sexuality provide important insights into the forces of sexual difference in highlighting in different historical periods and political economies, from the Rococo period of pre-evolutionary thought to the modern era. It compiles contributions from a diverse group of scholars to the contemporary debates surrounding the subject-object divide and for healing the nihilism inherent in Western metaphysics and the modern scientific paradigm. This book presents a significant contribution to current debates surrounding the subject-object divide and for healing the nihilism inherent in Western metaphysics and the modern scientific paradigm through which to understand him. It is possible for Jung to be heard by a wider audience in the field of psychology today because much of his work is better understood through a post-modern lens and also because the ideas of the analytical psychology of Carl Jung are so much in line with Jung’s own. This dissertation compares, in particular, Jung’s theories of evolutionary consciousness with Kegan’s work on adult development and life phase. It argues for a shift from the concept of consciousness, which he associates with modernism, to a stage 5 level of consciousness, which he associates with postmodernism, which has components that are strikingly similar to Jung’s concept of individuation. Kegan suggests that we are being forced to be postmodern before we are psychologically ready and that there is yet so a lack of holding environment to help us smoothly through the transition. I argue that Jung’s view of the psyche, which transcends the human ego and builds a bridge to the other, may provide that holding environment.

The Art of C. G. Jung-The Foundation of the Works of C. G. Jung 2016-11-20 A lavishly illustrated volume of C.G. Jung’s visual work, from drawing to painting to sculpture. A world-renowned, founding figure in analytical psychology, Jung was a prolific artist whose work is integral to his theories. This volume includes approximately 300 works of Jung’s, many of which are unpublished or unknown. The book is a comprehensive look at Jung’s work, covering a wide range of themes and styles. It includes a section on Jung’s concept of the “archetype,” the idea that all humans share certain universal patterns that shape their behavior and experience. It also explores Jung’s concept of the “collective unconscious,” the idea that the unconscious patterns of all human beings are derived from common ancestral patterns. The book includes numerous illustrations and drawings, as well as a detailed examination of Jung’s work in relation to his theories.
thought and words, as it integrated stunning symbolic images with an exploration of “thinking in images” in therapeutic work and the development of the method of Active Imagination. The remarkable depictions that burst forth from the pages of that calligraphic volume remained largely unrecognized and unexplored until publication. The release of The Red Book generated enormous interest in Jung’s visual works and allowed scholars to engage with the legacy of Jung’s creativity. The essays collected here present previously unpublished artistic work and address a remarkably broad spectrum of artistic accomplishment, both independently and within the context of The Red Book, itself widely represented. Tracing the evolution of Jung’s visual efforts from early childhood to adult life while illuminating the close relation of Jung’s lived experience to his scientific and creative endeavors, The Art of C.G. Jung offers a diverse exhibition of Jung’s engagement with visual art as maker, collector, and analyst.

Body, Mind and Healing After Jung-Raya A. Jones 2010-07-02 It is difficult to point to an aspect of Jungian psychology that does not touch on mind, body and healing in some way. In this book Raya Jones draws on the triad of body, mind and healing and (re)presents it as a domain of ongoing uncertainty within which Jung’s answers stir up further questions. Contributors from both clinical and scholarly backgrounds offer a variety of cultural and historical perspectives. Areas of discussion include: the psychosomatic nature of patients’ problems transferrence and counter-transferrence therapeutic techniques centred on movement or touch. Striking a delicate balance between theory-centred and practice-oriented approaches Body, Mind and Healing After Jung is essential reading for all Jungians.

Explaining Postmodernism-Stephen Ronald Craig Hicks 2004

Jung and Film-Christopher Hauke 2001 The work of Jung is not useful only for therapy, but also as a way of understanding the world, transcending many areas, including film. This is the first book to apply Jungian analysis specifically to film criticism. Jung & Film brings together some of the best new writing from both sides of the Atlantic. Christopher Hauke, Ian Alister, and an excellent array of contributors look at how Jungian ideas can help us understand films and the genres to which they belong, illustrating this with examinations of seminal films including Pulp Fiction, Blade Runner, and 2001 - A Space Odyssey. Both scholarly thinking and therapeutic insight come together here with the focus on movies and their place in our psychological development. Taking a fresh look at an ever-changing medium, Jung & Film is essential reading for academics and students of Analytical Psychology, as well as Film, Media and Cultural Studies.

Integrative Spirituality-Patrick J. Mahaffey 2018-10-29 In Integrative Spirituality, Patrick J. Mahaffey elucidates spirituality as a developmental process that is enhanced by integrating the teachings and practices of multiple religious traditions, Jungian depth psychology, and contemplative yoga. In the postmodern world of religious pluralism, Mahaffey compellingly argues that each of us must fashion a unique path to wholeness which integrates aspects of life and of the self that have become disconnected and disowned. Integrative Spirituality uniquely conjures four components: exemplary religious pluralists from three traditions, individuation, the forms of contemplative Hindu yoga that have been successfully transmitted to the West, and a presentation of two models for integrating psychological growth and spiritual awakening. The book presents pioneering practitioners in each field who exemplify how we may fashion our own approach to integrating both spiritual awakening and psychological development and delineates an array of spiritual practices that integrate the somatic, psychological, interpersonal, and spiritual aspects of life. Ultimately, Mahaffey contends that integrative spirituality is a mode of being that fully embraces the divinity inherent in each of us and in the world. Integrative Spirituality will be essential reading for academics and students of Jungian and post-Jungian studies, transpersonal and Jungian psychology, and religious studies and contemplative education. It will also be of interest to analytical and depth psychologists in practice and in training, and to anyone seeking a greater understanding of spirituality, psychological growth, religious traditions, individuation, and contemplative yoga.
