Just exercise just what we pay for under as skillfully as review generative phonology what you considering to read!

linguistics - Transformational-generative grammar | Britannica
linguistics - linguistics - Transformational-generative grammar: The most significant development in linguistic theory and research in the 20th century was the rise of generative grammar, and, more especially, of transformational-generative grammar, or transformational grammar, as it came to be known. Two versions of transformational grammar were put forward in the mid-1950s, the first by

linguistics - Language classification | Britannica
linguistics - linguistics - Language classification: There are two kinds of classification of languages practiced in linguistics: genetic (or genealogical) and typological. The purpose of genetic classification is to group languages into families according to their degree of diachronic relatedness. For example, within the Indo-European family, such subfamilies as Germanic or Celtic are

Linguistics - Wikipedia
Linguistics is the scientific study of language. It encompasses the analysis of every aspect of language, as well as the methods for studying and modelling them. The traditional areas of linguistic analysis include phonetics, phonology, morphology, syntax, semantics, and pragmatics. Each of these areas roughly corresponds to phenomena found in human linguistic systems: sounds (and gesture, in

Noticing hypothesis - Wikipedia
The noticing hypothesis is a theory within second-language acquisition that a learner cannot continue advancing their language abilities or grasp linguistic features unless they consciously notice the input. The theory was proposed by Richard Schmidt in 1990. The noticing hypothesis explains the change from linguistic input into intake and is considered a form of conscious processing.
